

What is claimed is:

1. A storage case for a magnetic tape cassette, wherein the storage case is formed of resin material which is transparent to such an extent that an interior of the storage case is visible, and the resin material includes a metallocene catalyst to provide strength for the storage case.

2. The storage case for a magnetic tape cassette as set forth in claim 1, wherein the metallocene catalyst is added to the resin material with from 5 mass % to 25 mass %.

3. The storage case for a magnetic tape cassette as set forth in claim 2, wherein the metallocene catalyst is added to the resin material with from 10 mass % to 15 mass %.

4. The storage case for a magnetic tape cassette as set forth in claim 1, wherein the metallocene catalyst is metallocene-polyethylene.

5. The storage case for a magnetic tape cassette as set forth in claim 4, wherein the metallocene-polyethylene is added to the resin material with from 5 mass % to 25 mass %.

6. The storage case for a magnetic tape cassette as set forth in claim 5, wherein the metallocene-polyethylene is added
